(54) PROGRAM CREATING DEVICE USING PATTERN

(57)Abstract:

PURPOSE: To improve the working efficiency of a program creating device by adding the own-coding operations to a program skeleton and then reflecting the necessary ones of those added own-coding operations onto the program skeleton that is created again.

CONSTITUTION: The own-coding operations are added to a program skeleton obtained by customizing a program pattern and then the necessary ones of those added own-coding operations are reflected on the program skeleton obtained by customizing again the program pattern. Under such conditions, an own-coding creating part 106 is provided to control the creation of the processing (own-coding operation) property to a user together with an own-coding succession part 107, an editing buffer part 109, an own-coding control part 112, a skeleton holding part 105, etc. Thus a program developer can edit the own-coding operations for each function and the working efficiency is improved for development of a program when the program pattern is customized again.
